Creation is at war in Mexico. Creation has always won. Creation has time on its side. Individual humans do not. The criminals in Mexico is waging a lost battle. The War is already won by Creation.

You can destroy part of the universe, part of life, part of the Mexican people, their daughters, their children, but Creation is watching YOU. There will not be any retribution, There will not be any judgment. Because you will not survive to be judged.

Good Luck
